

Strachan®

Strachan is the official and exclusive cloth of the World Eightball Pool Federation and is used and endorsed by Home Leisure Direct, Ultimate Pool and leading pool table manufacturers Rasson, DPT, Supreme and across the Signature range.

For operators, pubs, club owners, and home customers Strachan is a brand that can be trusted. It looks great from the moment it's fitted, will continue to perform over its lifespan. The Strachan name, classic appearance, lustre and sheen make it the perfect accompaniment for any English pool table. Its superior nap provides players with unrivalled ball control, speed and positional accuracy.

The range of Strachan English Pool Cloths – Superfine, 6811 and 777 are produced at the specialist textile mills in Stroud, Gloucestershire in a wide range of colours.

English napped cloth is produced using traditional methods and wool is of course, a natural product. The lighter colour shades of cloth, namely but not limited to Blues and Greys, can come through with light dots and specs if the nap is inspected closely. This is an unavoidable by-product of the dying process and does not affect the quality of gameplay the cloth offers.

Strachan's Production and UK Sales Manager, Stuart Gardiner explains, "Only the finest Merino wool is used in Strachan cuesports cloth, it is the very best material for making professional snooker and pool cloths. Being a natural fibre there is a small amount of wool that can be damaged by the environment on the sheep before shearing and as a result there may be an occasional spot of wool that cannot take the dye. This is natural and is completely unavoidable. It does not affect play or durability in any way."

As such, Home Leisure Direct cannot accept recourse from customers on any table fitted with cloth arriving as described above.
